## URGENT CARE VISIT VS ED VISIT

### Urgent Care

Urgent care provides fast, accessible medical help for non-life-threatening issues outside of primary care hours, offering walk-in convenience, treatment for common ailments, quick prescriptions, and efficient care.

### Emergency Visit

To handle medical emergencies, which threaten life or long-term health, require immediate assessment, diagnosis, and treatment for severe injuries and illnesses.

#### Urgent Care

Closed Fracture

#### Emergency Care

Open Fracture

#### Urgent Care

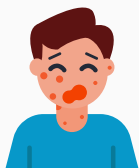

Sunburn

#### Emergency Care

Severe Burn

#### Urgent Care

Mild Allergic Reaction

#### Emergency Care

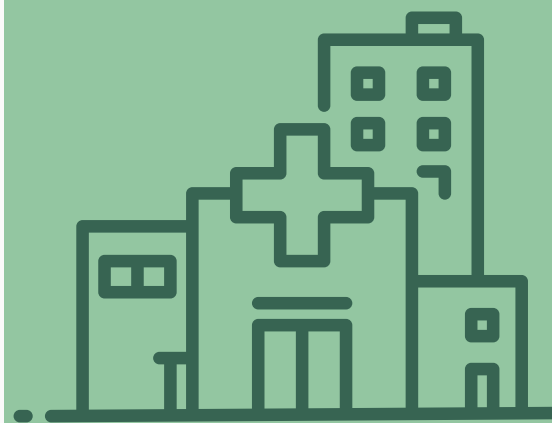

Poisoning

## STATISTICS

In 2025, the average cost of an emergency room visit is \$2,715, while a primary care physician visit can range from \$25 to \$400.

In 2023 61.4% of a study with 30,737 ER visits in the study were non urgent.

In 2024, the average wait time for an ED visit was a considerable 2 hours and 42 minutes, contrasting sharply with the much shorter average wait time of 15-45 minutes at an Urgent Care.
